WHY ME?

- I'm a solid backend developer who actually ships working code.
- I lead teams, fix problems fast, and care about clean architecture more than trendy buzzwords.
- Been deep in .NET since before it was cool — from legacy monoliths to modern microservices.
- Not pretending to be a DevOps guru, but I know my way around CI/CD and cloud enough to get things running.
- No fluff — just experience. Check my [portfolio](#), it'll speak for itself.

WORK EXPERIENCE

Accenture/Avanade **March. 2023 – Present**

.NET Team Leader – E-commerce solution for mBank | Sep, 2023 – Present *Remote*

- Leading a team of 3 developers: sprint planning, user story refinement, and development oversight
- Designing and implementing APIs in .NET 6–8 for a mobile banking application (microservices architecture)
- Driving CI/CD processes using Azure DevOps and Bitbucket
- Accountable for comprehensive testing strategy: Unit, Integration, Contract, Performance, and E2E tests

Backend Software Engineer – Nursing Mobile App | March, 2023 – Aug, 2024

- Developed backend services in .NET 8 hosted on Azure
- Contributed to the design of healthcare-related features supporting nurses' daily workflows

Exadel **Nov. 2021 – Feb. 2023**

Residents Management Software – .NET Full Stack developer | Jan, 2022 – Feb, 2023 *Remote*

- Developed a web-based application using Blazor (monolithic, on-premise architecture)
- Delivered full-stack features from database to UI, ensuring system stability and performance

US Accounting Company – .NET Backend Software Engineer | Nov, 2021 – March, 2022

- Developed REST APIs in .NET 6 (Azure microservices architecture)
- Worked in close collaboration with US-based stakeholders to deliver business-critical solutions

Way2Send **June. 2019 – Oct. 2021**

.NET Team Leader – WMS software | April, 2021 – Oct, 2021 *Warsaw, Poland*

- Managed a team of 3 developers: handled requirement analysis, task delegation, and code reviews
- Built and maintained Web APIs in .NET for a monolithic on-premise WMS platform

Full Stack Developer – .NET SaaS Solution | June, 2019– March, 2021

- Developed features in Angular and C# for a custom E-commerce SaaS solution
- Migrated the legacy system from .NET Framework 3.5 to .NET Core 3.0
- Implemented solutions based on client feedback and provided second-line technical support

Additional Projects

- Management Application for Personal Trainer (Angular + .NET) **2024**
- Users and Roles management software (node.js) **2023**

EDUCATION

Warsaw University of Technology **2018-2021**

Bachelor of Science Electrical Engineering, Faculty of Electrical Engineering

SKILLS

- **.NET/C#:** .NET Framework 3.5+, .NET 5.0+, ASP.NET core, ASP.NET MVC, Entity Framework, XUnit, Blazor
- **Database:** MsSql, MySql, PostgreSQL, CosmosDB, MongoDB
- **Others:** Node.js, Angular, Azure Functions, Docker, k8s, GraphQL, Rest, SOAP, CQRS, MediatR, DDD, Jira, Azure devops, bitbucket, CI/CD, Redis, RabbitMQ, Grafana, Splunk, Git, Fluent Validation/Assertions, html, css, microservices, DevExpress, Prometheus,

CERTIFICATIONS & INTERESTS

- **Certifications:** AZ-900, AI-900, IELTS (English C1)
- **Interests:** Powerlifting; Fitness; Traveling; Cryptocurrencies;

I hereby give consent for my personal data to be processed by file receiver for the purpose of conducting recruitment for the position for which I am applying.
